Dates shown on reprints

Reprints dated at last amendment All reprints produced on or after 1 July 2002, hard copy and electronic, are dated as at the last date of amendment. Previously reprints were dated as at the date of publication. If a hard copy reprint is dated earlier than an electronic version published before 1 July 2002, it means the legislation was not further amended and the reprint date is the commencement of the last amendment.

If the date of a hard copy reprint is the same as the date shown for an electronic version previously published, it merely means that the electronic version was published before the hard copy version. Also, any revised edition of the previously published electronic version will have the same date as that version.

Replacement reprint date If the date of a hard copy reprint is the same as the date shown on another hard copy reprint it means that one is the replacement of the other.

- (1) The holder of an SM unit, or a person acting under the SM unit, may take, in an SM year, the prescribed weight of spanish mackerel for the SM unit.
- (2) The authorisation for each SM year is the holder's *entitlement* under the SM unit for that SM year.
- (3) However, the entitlement applies only while the holder holds an SM fishery licence that is in force.
- (4) The entitlement is subject to any relevant prohibitions or restrictions under this regulation, a management plan or a condition or other provision of the SM unit or SM fishery licence.

Examples of relevant restrictions—

25FA Meaning of *prescribed weight* of spanish mackerel for an SM unit

- (1) For section 25F(1), the *prescribed weight*, of spanish mackerel, for an SM unit, is—
 - (a) 1kg of (whole weight) spanish mackerel; or

10 Section 44 (Things authorised by fishery symbol)

of (whole weight) spanish mackerel (the *adjusted weight equivalent*), worked out under subsection (2).

- (2) If subsection (1)(b) applies, the adjusted weight equivalent is the amount worked out by using the following formula—

where—

WWE is the adjusted weight equivalent for an SM unit.

NSM is the number of SM units issued by the chief executive.

- (3) In this section—

relevant day means the earliest day on which—

- (e) if, in deciding an appeal mentioned in paragraph (a) or (d), the tribunal has given the chief executive directions—the directions have been complied with.

Subdivision 2 Use of SM unit entitlements

25G When SM unit entitlement is *used* for an SM year

- (1) The entitlement of an SM unit held by a person is *used* for an SM year—
- (a) when the holder, or a person acting under the SM unit, has taken, in that SM year under any SM fishery licence held by the SM unit holder, an amount of (whole weight) spanish mackerel for the SM unit equalling the

holder's entitlement under the SM unit; or

- (b) if section 25H applies.
- (2) The ***unused entitlement*** of a holder's SM unit for an SM year is the amount of (whole weight) spanish mackerel for the SM unit that has not been taken, for the SM year, under any SM fishery licence held by the SM unit holder.

- (2) The certificate must state each of the following—
 - (a) the certificate number;
 - (b) the holder's name;

 - (e) a level 5 assessment—\$12388.10.
- (2) For subsection (1), an application requires a level 1, 2, 3, 4 or 5 assessment if the chief executive believes the application will require that level of assessment having regard to each of the following—

110Q Applicable fee if application relates to more than 1 development

If a development application is for more than 1 development mentioned in schedule 9, the fee for the assessment of the application is the higher of the applicable fees stated in the schedule for the developments.

Example—

A development application is for both of the following—

- (a) a material change of use of premises for aquaculture for which the relevant assessment fee is the fee for a level 5 assessment;
- (b) operational work that is the removal, destruction or damage of marine plants for which the relevant assessment fee is the fee for a level 3 assessment.

The fee payable for the assessment of a development application for only the development mentioned in paragraph (a) is \$11700. The fee payable for the assessment of a development application for only the development mentioned in paragraph (b) is \$2300.

 - (ii) otherwise—the amount stated for the symbol; and

 - (d) the fee is payable in addition to any registration fee for the licence stated in the table.
- (5) If a fee stated in schedule 10, table 1, is not paid as required under subsection (4), the amount of the fee becomes a debt payable to the State.
- (6) If, under schedule 10, a fee for a matter is stated to be at reasonable cost, but no more than actual cost—
- (a) the chief executive must decide the amount the chief executive considers is the likely reasonable cost for the matter; and
 - (b) if the actual cost of deciding the matter or doing the thing to which the fee relates is less than the fee paid, the chief executive must refund to the person who pays the fee the difference between the fee paid and the actual cost.

Schedule 4A Measurement of fish

section 21

Part 1 Measurement of size of particular fish

1 Measurement of size of blue swimmer crab

- (1) The size of a blue swimmer crab is decided by measuring the distance between—
 - (a) the notch immediately forward of the base of the large lateral spine of the crab on one side of the crab; and
 - (b) the notch immediately forward of the base of the large lateral spine of the crab on the other side of the crab.
- (2) The following figure is an illustration of the operation of subsection (1) in diagrammatic form—

The distance between the 2 vertical dotted lines is the distance to be measured to decide the size of a blue swimmer crab

Schedule 4A (continued)

2 Measurement of size of fin fish other than gulf fin fish

- (1) The size of a fin fish, other than gulf fin fish under the Gulf Plan, is decided by measuring, with the fish in the required position—
- (a) for bar-tailed flathead, mud flathead or sand flathead—the distance along a straight line along the centre of the fish's underside from the fish's mouth to the end of its tail; or
 - (b) for a fin fish, other than gulf fin fish under the Gulf Plan, not mentioned in paragraph (a)—the distance along a horizontal line (the *measurement line*) along the fish's side from its mouth to—
 - (i) the point on the measurement line where the fish's tail ends; or
 - (ii) if part of the tail extends further than the point on the measurement line where the fish's tail ends—the point on the measurement line corresponding in length with the end of the longest part of the fish's tail.
- (2) The following figure is an illustration of the operation of subsections (1)(b) and (4), definition *required position*, in diagrammatic form—

- (3) For subsection (1), the size of the fish must be measured without stroking or otherwise physically manipulating the fish, other than to the extent reasonably necessary to allow the fish to be measured as required under the subsection.

Schedule 4A (continued)

(4) In this section—

required position means—

- (a) for a fish mentioned in subsection (1)(a)—lying on its underside; or
- (b) for a fish mentioned in subsection (1)(b)—lying on its side with the dorsal fin facing outward and its mouth closed.

Note—

For the size of gulf fin fish under the Gulf Plan, see section 14(2) of that plan.

3 Measurement of size of mud crab

The size of a mud crab is decided by measuring—

- (a) if its carapace is not damaged or missing—the widest part of its carapace; or
- (b) if its carapace is damaged or missing—the underside of its body on 1 side, from the notch at the junction of the claw with the body to the notch at the junction of the last leg with the body.

4 Measurement of size of painted crayfish

The size of a painted crayfish is decided by measuring, in a straight line—

- (a) if its carapace is not damaged or missing—from the anterior mid-dorsal margin to the posterior mid-dorsal margin of the cephalothorax; or
- (b) if its carapace is damaged or missing—along the dorsal surface from the anterior margin of the first abdominal somite to the posterior margin of the sixth abdominal somite, when the tail is laid flat on a horizontal surface.

5 Measurement of size of pearl oyster

The size of a pearl oyster is decided by measuring from the

Schedule 4A (continued)

edge of its butt or hinge to the opposite edge of its shell, whether or not the shell is broken or chipped.

6 Measurement of size of trochus

The size of a trochus is decided by measuring the widest part of the base of its shell.

Part 2 Measurement of weight of particular fish

7 Measurement of weight of green snails

The weight of a green snail is its empty shell weight.

Part 3 Measurement of total volume of fish

8 How total volume must be measured

- (1) This section provides for how a total volume of fish is measured.
- (2) The volume of any fish that are in a container (*contained fish*) must be measured by reference to the volume of the container when it is empty.

Note—

- 1 An empty container with internal dimensions of 571mm x 381mm x 305mm, commonly called a 'lug basket', has a capacity of approximately 66L.
- 2 An empty container with internal dimensions of 605mm x 280mm x 90mm, commonly called a 'prawn carton', has a capacity of approximately 0.0153m³.

Schedule 4A (continued)

- (3) For subsection (2), a fish is not a contained fish if any part of it protrudes above the top of the container.
- (4) The volume of any of fish that are not contained fish (***uncontained fish***) must be measured by—
 - (a) placing them in a container or containers so that no part of any of the fish protrudes above the top of the container or containers; and
 - (b) measuring the volume of each container when it is empty; and
 - (c) reference to the volume of the container or containers.
- (5) The total volume is worked out by adding together the volume of all of the contained and uncontained fish.
