Division 2 Some features of this regulation

4 Definitions

The dictionary in schedule 5 defines particular words used in this regulation.

5 Compliance with standards

- (1) In this regulation, unless otherwise stated—
- (a) a reference to a standard using the designation made up of ‘AS’ and a number is a reference to the standard as in force from time to time under that designation; and

Example—

‘AS 1754’ is a reference to the standard that is in force under that designation at the relevant time, including, for example, AS 1754–1991.

- (b) a reference to a standard using the designation made up of ‘AS/NZS’ and a number is a reference to the standard as in force from time to time under that designation; and

Example—

‘AS/NZS 1754’ is a reference to the standard that is in force under that designation at the relevant time, including, for example, AS/NZS 1754–1995, AS/NZS 1754–2000 or AS/NZS 1754–2004.

- (c) a reference to a standard using the designation made up of ‘UN ECE’ and a number is a reference to the standard as in force from time to time under that designation.

Example—

‘UN ECE 22.05’ is a reference to the standard that is in force under that designation at the relevant time.

- (2) If this regulation requires a person to fit or use a thing that complies with a standard mentioned in subsection (1), the person complies with the requirement if, when the thing was manufactured, the thing complied with the standard in force under the designation at that time.

- (3) In this section—

standard means AS, AS/NZS or UN ECE.

6 Examples

A diagram under a provision is an example for the provision.

7 Sections 7–10 not used

Note—

This regulation is based on the Australian Road Rules. Some provisions of the Australian Road Rules contain provisions that are not relevant to the operation of this regulation. To maximise uniformity between this regulation and the Australian Road Rules, the numbers of some sections that are not relevant have not been used in the numbering of this regulation, unless required for provisions particular to the State.

Part 2 Application of this regulation

Maximum penalty—20 penalty units.

- (1A) Subsection (1) also applies to a rider of a bicycle who approaches and enters an intersection from a bicycle storage area.
- (1B) Despite subsection (1), if there is space in a bicycle storage area for 2 riders of bicycles to be next to each other, the rider on the right may approach and enter the intersection as near as practicable to the right side of the other rider, but only if that other rider approaches and enters the intersection in accordance with this section.
- (2) In this section—
road does not include a road-related area.

Example—

Starting a left turn from a road (except a multi-lane road)

28 Starting a left turn from a multi-lane road

- (2A) If there is a bicycle storage area before an intersection that extends across 1 or more marked lanes of a multi-lane road, a rider of a bicycle turning left must approach and enter the intersection from within the part of the bicycle storage area that is directly in front of the left marked lane or of a bicycle lane that is on the left side of the road.

Maximum penalty—20 penalty units.

- (3) In this section—

left lane means—

- (a) the marked lane nearest to the far left side of the road; or

- (2) A driver turning at an intersection with traffic lights who approaches, or is at, a red traffic light on the road that the driver is entering does not have to stop for the red traffic light if there is no stop line or stop here on red signal sign at or near the traffic light.

59 Proceeding through a red traffic light

- (1) If traffic lights at an intersection, bicycle crossing or marked foot crossing are showing a red traffic light, a driver facing the red traffic light must not enter the intersection, bicycle crossing or marked foot crossing.

Maximum penalty—20 penalty units.

Example—

A driver may stop after the stop line at an intersection with traffic lights showing a green traffic light, and not proceed through the intersection, because traffic is congested.

- (2) If the traffic lights or arrows change to red or yellow while the driver is stopped and the driver has not entered the intersection, the driver must not enter the intersection.

Maximum penalty—20 penalty units.

- (3) However, if the traffic lights are at an intersection with a left turn on red after stopping sign and the driver is turning left at the intersection, the driver may turn left after stopping.

Part 20 **Traffic control devices and traffic-related items**

Division 1 **General**

314 **Diagrams of traffic control devices, traffic-related items and symbols**

- (1) A diagram in this regulation of a traffic control device, traffic-related item, or symbol represents a likeness of the device, item or symbol.
- (2) If there are 2 or more diagrams of a traffic sign in schedules 2 and 3 or of a traffic-related item or symbol in schedule 4, each diagram represents a likeness of a permitted version of the sign, item or symbol.
- (3) If a diagram of a traffic sign in schedule 2 or 3 or of a traffic-related item or symbol in schedule 4 is in black and white, the permitted version of the sign, item or symbol is in black and white only.
- (4) If a diagram of a traffic sign, traffic-related item or symbol in a section of this regulation is in black and white and the sign, item or symbol is not in black and white only in schedule 2, 3 or 4, the diagram is a black and white representation of the sign, item or symbol and is not a permitted version of the sign, item or symbol.

315 **Legal effect of traffic control devices**

- (1) A traffic control device of a kind mentioned in this regulation has effect for this regulation if—
 - (a) the device is on a road; and
 - (b) the device complies substantially with this regulation.
- (2) A traffic control device is taken to comply substantially with this regulation unless the contrary is proved.

316 When do traffic control devices comply substantially with this regulation

- (1) A traffic sign complies substantially with this regulation if—
 - (a) it is a reasonable likeness of a diagram in schedule 2 or 3 of that kind of traffic sign; or
 - (b) for a traffic sign of a kind for which there is not a diagram in schedule 2 or 3—it complies substantially with a description of that kind of traffic sign in this regulation and, if the description includes a symbol for which there is a diagram in schedule 4, the symbol on the sign is a reasonable likeness of the diagram.
- (2) A road marking complies substantially with this regulation if it complies substantially with a description of that kind of road marking in this regulation and, if the description includes a symbol for which there is a diagram in schedule 4, the symbol in the road marking is a reasonable likeness of the diagram.
- (3) A traffic control device (except a traffic sign or a road marking) complies substantially with this regulation if the device complies substantially with a description of that kind of traffic control device in this regulation and, if the description includes a symbol for which there is a diagram in schedule 4, the symbol on the device is a reasonable likeness of the diagram.

Example—

A red and white post temporarily missing from a children’s crossing complies substantially with the description of a children’s crossing under section 80(6).

- (4) A traffic sign may be a reasonable likeness of a diagram of a kind of traffic sign mentioned in this regulation even though—
 - (a) the dimensions of the sign, or of anything on the sign, are different; or
 - (b) the sign has additional information on or with it; or
 - (c) the number on the sign is different; or
 - (d) the sign has a different number of panels; or

[s 316]

- (e) the sign is combined on a single panel with 1 or more other traffic signs; or
- (f) for a parking control sign—words, figures, symbols, or anything else, on the sign are differently arranged; or
- (g) for a bus lane sign, emergency stopping lane only sign, one-way sign or parking control sign—the sign has an arrow pointing in a different direction; or
- (h) for a separated footpath sign or an end separated footpath sign—the pedestrian and bicycle symbols are reversed; or
- (i) for a road access sign—information on or with the sign indicates (whether by different wording or in another way) that it applies to different or additional vehicles or persons; or
- (j) there is a variation in shade or brightness between a colour on the sign and the equivalent colour in the diagram.

Example for subsection (4)(b)—

A speed limit sign near a school may say that the sign has effect at certain times. This additional information does not prevent the sign being a reasonable likeness of the diagram of a speed limit sign in schedule 2.

Example for subsection (4)(c)—

The diagram of the area speed limit sign in schedule 2 has the number '60'. A particular area speed limit sign may have another number, for example, '50'. The different number on the sign does not prevent the sign being a reasonable likeness of the diagram.

Examples for subsection (4)(d)—

- 1 A school zone sign may have the indicated speed limit, the words 'school zone', and the times of operation, on a single panel or separate panels.
- 2 An end bicycle path sign may have the word 'end' on a separate panel or on the same panel as the rest of the sign.

Example for subsection (4)(e)—

A no parking sign that operates at certain times may be combined on a single panel with a permissive parking sign allowing pay parking at other times.

Example for subsection (4)(f)—

A permissive parking sign limiting parking to 2 hours may have the time limit above, or below, the word ‘parking’.

Example for subsection (4)(i)—

The diagram of the road access sign in schedule 2 says ‘no pedestrians bicycles animals beyond this point’. The replacement of the word ‘bicycles’ by the word ‘tractors’ on a particular sign does not prevent the sign being a reasonable likeness of the diagram.

- (5) A variable illuminated message sign may also be a reasonable likeness of a diagram of a kind of traffic sign in schedule 2 or 3 even though the colour of the sign, or of anything else on the sign, is different.

Example of standard sign and variable illuminated message sign—

Speed limit sign (Standard sign)

Speed limit sign (Variable illuminated message sign)

- (6) A symbol on or in a traffic control device may be a reasonable likeness of a diagram of a kind of symbol mentioned in this regulation even though the dimensions of the symbol, or of anything on the symbol, are different.
- (7) In this section—
panel includes a board, plate and screen.

317 Information on or with traffic control devices

- (1) A traffic control device may, by the use of words, figures, symbols or anything else indicate any of the following—
- (a) the times, days or circumstances when it applies or does not apply;

[s 318]

- (b) the lengths of road or areas where it applies or does not apply;
- (c) the persons to whom it applies or does not apply;
- (d) the vehicles to which it applies or does not apply;
- (e) other information.

Examples of circumstances—

- 1 A speed limit sign may indicate that it applies when the lights at a children's crossing are flashing.
- 2 A speed limit sign may indicate that it applies when children are present.

- (2) In this section—

traffic control device includes a board, device, plate, screen, word, figure, symbol, or anything else, with a traffic control device that provides information about the application of the traffic control device.

Examples of information with a traffic control device—

- a plate erected immediately below a no U-turn sign indicating that the sign applies on Monday to Friday between 8a.m. and 6p.m.
- an illuminated board erected close to, but not next to, a no entry sign indicating that commercial trucks are permitted to pass the sign when the words on the board are illuminated

318 Limited effect of certain traffic control devices

- (1) If information on a traffic control device indicates that the device applies during particular times, on particular days, in particular circumstances, to a particular length of road or area, or to particular persons or vehicles, the device has effect only for the indicated times, days, circumstances, length of road, area, persons or vehicles.

Example—

a shared zone sign on a road into an area indicating that the sign applies on Monday to Friday between 7a.m. and 6p.m.

- (2) If information on a traffic control device indicates that the device does not apply during particular times, on particular days, in particular circumstances, to a particular length of road

or area, or to particular persons or vehicles, the device does not have effect for the indicated times, days, circumstances, length of road, area, persons or vehicles.

Examples—

- a plate erected next to a pedestrian crossing sign at a place indicating that the sign does not apply on a particular day
- a board erected close to a bus lane sign above a marked lane indicating that the sign does not apply when the words on the board are illuminated

- (3) If information on a traffic control device that is at a place indicates that it applies on a particular day of the week, the device does not have effect on a day that is a public holiday for the place unless information on the device states otherwise.

Example—

If a loading zone sign indicates that it applies on Monday to Friday between 9a.m. and 4p.m. and information on or with the sign does not indicate that it applies on public holidays, the sign does not have effect on any public holiday falling on a Monday to Friday.

- (4) In this section—

traffic control device includes a board, device, plate, screen, word, figure, symbol, or anything else, with a traffic control device that provides information about the application of the traffic control device.

319 Legal effect of traffic-related items mentioned in this regulation

- (1) A traffic-related item of a kind mentioned in this regulation has effect for this regulation if—
- (a) the item is on a road or on a vehicle on a road; and
 - (b) the item complies substantially with this regulation.
- (2) A traffic-related item is taken to comply with this regulation unless the contrary is proved.

320 When do traffic-related items comply substantially with this regulation

- (1) A traffic-related item complies substantially with this regulation if—
 - (a) it is a reasonable likeness of a diagram in schedule 4 of that kind of traffic-related item; or
 - (b) for a traffic-related item of a kind for which there is not a diagram in schedule 4—
 - (i) it complies substantially with a description of that kind of traffic-related item in this regulation; and
 - (ii) if the description includes a symbol for which there is a diagram in schedule 4, the symbol on the item is a reasonable likeness of the diagram.
- (2) A traffic-related item may be a reasonable likeness of a diagram of a kind of traffic-related item mentioned in this regulation even though—
 - (a) the dimensions of the item or of anything on the item are different; or
 - (b) the item has additional information.
- (3) A symbol on a traffic-related item may be a reasonable likeness of a diagram of a kind of symbol mentioned in this regulation even though the dimensions of the symbol or of anything on the symbol are different.

321 Meaning of information on or with traffic control devices and traffic-related items

A word, figure, symbol or anything else used on or with a traffic control device or traffic-related item has the same meaning as in this regulation.

322 Reference to traffic control devices and traffic-related items on a road etc.

- (1) A traffic control device or traffic-related item above or near a road is taken to be on the road.

Examples—

- 1 A speed limit sign erected on a post at the side of a road is taken to be a speed limit sign on the road.
 - 2 A traffic lane arrow on a structure immediately above the road is taken to be a traffic lane arrow on the road.
 - 3 A do not overtake turning vehicle sign attached to a vehicle on a road is taken to be a do not overtake turning vehicle sign on the road.
- (2) However, the device or item is taken to be on the road only if it is clearly visible to road users to whom it is designed to apply.

Example—

A shared zone sign erected on a post near the side of a road is a traffic sign on the road only if it is clearly visible to drivers driving on the road during the day and in normal weather conditions.

- (3) A traffic control device or traffic-related item above or near an area or place is taken to be in or at the area or place.

Examples—

- 1 Traffic lights erected outside the area of an intersection, but near that area, are taken to be traffic lights at the intersection.
 - 2 A hook turn only sign fixed to a structure above a road that is close to, but before, an intersection is taken to be a hook turn only sign at the intersection.
 - 3 A parking control sign near the side of a road is taken to be at the side of the road.
 - 4 A parking control sign near the centre of a road is taken to be at the centre of the road.
- (4) However, the device or item is taken to be in or at the area or place only if it is clearly visible to road users to whom it is designed to apply.

Example—

A no right turn sign suspended from wires above a road close to, but before, an intersection is a traffic sign at the intersection only if it is clearly visible to drivers approaching the intersection during the day and in normal weather conditions.

[s 323]

- (5) Without limiting subsection (3), a traffic control device or traffic-related item above or near a break in a dividing strip is taken to be at the break.

Example—

A no U-turn sign erected in a dividing strip close to, but before, a break in the dividing strip is taken to be at the break.

- (6) However, the device or item is taken to be at the break only if it is clearly visible to road users to whom it is designed to apply.
- (7) A traffic control device or traffic-related item is taken to comply with subsection (2), (4) or (6) unless the contrary is proved.
- (8) In this section—

clearly visible means—

- (a) for a traffic signal—clearly visible during the day and night in normal weather conditions; or
- (b) for another traffic control device or a traffic-related item—clearly visible during the day in normal weather conditions.

day means the period between sunrise on a day and sunset on the same day.

normal weather conditions means weather conditions that are not hazardous weather conditions causing reduced visibility.

323 References to lights that are traffic signals

A reference in this regulation to a light that is, or is part of, traffic signals is a reference to a steady light, unless otherwise expressly stated.

323A Audible lines

- (1) An audible line is a line on a road that is made up of a series of closely spaced raised pieces of material designed to create a continuous noise or vibration if driven on by a motor vehicle.

-
- (2) A reference in this regulation to a line is to be taken to include a reference to an audible line, unless otherwise expressly stated.
 - (3) For the purposes of this regulation—
 - (a) an audible line is taken to be continuous even if there is no physical link between the pieces of material making up the line; and
 - (b) if there is no physical link between those pieces, the colour of the audible line is taken to be the visible colour of those pieces.

Division 2 Application of traffic control devices to lengths of roads and areas

324 Purpose of division

- (1) This division contains rules explaining when traffic control devices apply to lengths of road and areas.
- (2) Other relevant rules are found elsewhere in this regulation.

325 References to traffic control devices—application to lengths of road and areas

In applying this regulation to a length of road or an area, unless the contrary intention appears, a reference to a traffic control device is a reference to a traffic control device applying to the length of road or area.

326 When do traffic control devices apply to a length of road or area—the basic rules

- (1) A traffic control device applies to a length of road or an area if—
 - (a) the device applies to the length of road or area under 1 or more provisions of this regulation; or

[s 327]

- (b) the device, the position of the device, or information on or with the device indicates that the device applies to the length of road or area.
- (2) A traffic control device does not apply to a length of road or an area if information on or with the device expressly indicates that it does not apply to the length of road or area.
- (3) Subsection (2) applies despite any other provision of this division.
- (4) In subsection (1)(b)—
the device includes another traffic control device.

327 Length of road to which a traffic sign (except a parking control sign) applies

The length of road to which a traffic sign on a road (except a parking control sign) applies is worked out in the direction driven by a driver, or travelled by a pedestrian, on the road who faces the sign before passing it.

Example—

Section 21(2) provides that a speed limit sign applies to the length of road beginning at the sign and ending at the nearest of a different speed limit sign, an end speed limit sign or speed derestriction sign, or the end of the road. Only the nearest of those things, in the direction driven by a driver, or travelled by a pedestrian, who faces the sign before passing it, is relevant.

328 References to a traffic control device applying to a length of road

If, under this regulation, a traffic control device on a road applies to a length of road, the device applies only to a length of road on that road, unless otherwise expressly stated.

Example—

A speed limit sign on a road does not apply to roads leading off from the road.

329 Traffic control devices applying to a marked lane

- (1) A traffic control device (except a road marking) applies to a marked lane if—
 - (a) it is above the marked lane; or
 - (b) it is near the marked lane and the device, the position of the device, or information on or with the device indicates that it applies to the marked lane.

Example—

An emergency stopping lane only sign applies to the marked lane indicated by the arrow on the sign.

- (2) A road marking applies to a marked lane if it is on the surface of the lane.
- (3) However, a traffic control device does not apply to a marked lane if information on or with the device expressly indicates that the device does not apply to the marked lane.
- (4) In subsection (1)(b)—
the device includes another traffic control device.

330 Traffic control devices applying to a slip lane

- (1) A traffic control device (except a road marking) applies to a slip lane if—
 - (a) it is above the slip lane; or
 - (b) it is near the slip lane and on the left side of the slip lane; or
 - (c) it is near the slip lane and the device, the position of the device, or information on or with the device indicates that it applies to the slip lane.
- (2) A road marking applies to a slip lane if it is on the surface of the slip lane.
- (3) However, a traffic control device does not apply to a slip lane if information on or with the device expressly indicates that the device does not apply to the slip lane.

[s 331]

- (4) In subsection (1)(c)—
the device includes another traffic control device.

331 Traffic control devices applying to an intersection

A traffic control device—

- (a) applies to an intersection if it is at the intersection; and
- (b) does not apply to a slip lane at the intersection, unless information on or with the device expressly indicates that the device does not apply to the intersection.

332 Parking control signs applying to a length of road

- (1) If a parking control sign displays an arrow and is at the side of a road, then, unless information on or with the sign indicates otherwise, the sign applies to the length of road between the sign and the nearest (in the direction indicated by the arrow) of the following—
- (a) a parking control sign at that side of the road that displays an arrow indicating the opposite direction;
 - (b) a yellow edge line on the road;
 - (c) if the road ends at a T-intersection or dead end—the end of the road.
- (2) If a parking control sign displays an arrow and is at the centre of a road or on a dividing strip, then, unless information on or with the sign indicates otherwise, the sign applies to the length of road between the sign and the nearest (in the direction indicated by the arrow) of the following—
- (a) a parking control sign at that side of the road that displays an arrow indicating the opposite direction;
 - (b) a yellow edge line on the road;
 - (c) if the road ends at a T-intersection or dead end—the end of the road.

333 Parking control signs applying to a length of road in an area to which another parking control sign applies etc.

- (1) If a parking control sign applying to a length of road is in an area to which another parking control sign applies in accordance with section 335, the first parking control sign applies in the same way as it would apply if it were not in that area, and the second parking control sign does not apply to the length of road.

Example—

Parking control signs that establish a loading zone or taxi zone may operate on a length of road in an area where parking is otherwise restricted to residents only by other parking control signs on each road into the area.

- (2) If the area indicated by a people with disabilities road marking is in an area to which a parking control sign applies in accordance with section 335, the road marking applies in the same way as it would apply if it were not in that area, and the parking control sign does not apply to the area indicated by the road marking.

334 How parking control signs apply to a length of road

- (1) If a permissive parking sign, bicycle parking sign, motorbike parking sign, or a parking control sign for a zone mentioned in part 12, division 5, applies to a length of road and there are parking bays on the length of road, the sign applies only to the parking bays, unless information on or with the sign indicates otherwise.
- (2) If a parking control sign applies to a length of road, the sign is at the side of the road, and there are no parking bays to which the sign applies, then, unless information on or with the sign indicates otherwise, the sign applies to—
 - (a) any shoulder of the road on that side of the road; and
 - (b) the part of the road on the length of road extending from the far side of the road (excluding any road-related area) on that side of the road for—

[s 334]

- (i) if the sign, or information on or with the sign, includes the words ‘angle parking’ or ‘angle’—6 metres; or
- (ii) in any other case—3 metres.

Examples—

Example 1

Part of a road to which a parking control sign indicating angle parking applies

Example 2

Part of a road to which a parking control sign (except a sign indicating angle parking) applies

- (3) If a parking control sign applies to a length of road, the sign is at the centre of the road or on a dividing strip, and there are no parking bays to which the sign applies, then, unless information on or with the sign indicates otherwise, the sign applies to—
 - (a) if the sign is at the centre of the road, but not on a dividing strip—the part of the road on that length of road extending 3m from the centre of the road on each side of the road; or
 - (b) if the sign is on a dividing strip—the dividing strip on that length of road and the part of the road on that length of road extending 3m from each edge of the dividing strip.

335 Traffic control devices applying to an area

- (1) A traffic control device (except a road marking) applies to an area if—
 - (a) it is in the area; and
 - (b) the device, the position of the device, or information on or with the device indicates that the device applies to the area.
- (2) A traffic control device (except a road marking) also applies to an area if—
 - (a) there is an identical kind of traffic control device (the *first traffic control device*) on each road into the area; and
 - (b) the traffic control device is a traffic control device applying to an area, or information on or with the device indicates that it applies to an area; and
 - (c) information on or with a traffic control device on each road out of the area indicates that the first traffic control device no longer applies or that the area has ended.

Examples of traffic control devices applying to an area—

- a shared zone sign
 - a no stopping sign or no parking sign with the word ‘area’
 - a permissive parking sign with the words ‘parking area’
 - an end no parking area sign
 - an end no stopping area sign
 - an end parking area sign
- (3) A road marking applies to an area if—
 - (a) it is on the surface of the area; and
 - (b) the road marking, the position of the road marking, or information in or with the road marking indicates that the road marking applies to the area.
 - (4) However, a traffic control device does not apply to an area if information on or with the device expressly indicates that the device does not apply to the area.

[s 336]

- (5) A parking control sign that applies to an area applies to parking bays on each length of road in the area, and to other parts of each length of road, as if it were a parking control sign applying only to that length of road.
- (6) In this section—
 - road*, in subsection (2)(a) and (c) and for an area of road, does not include a road-related area.
 - the device*, in subsection (1)(b), includes another traffic control device.
 - the road marking*, in subsection (3)(b), includes another traffic control device.

336 How separated footpath signs and separated footpath road markings apply

- (1) A separated footpath sign, or separated footpath road marking, on a footpath applies in the way set out in this section.
- (2) The part of the footpath to the left of the centre of the footpath is designated—
 - (a) if a pedestrian symbol is on the left side of the sign or the path—for the use of pedestrians; or
 - (b) if a bicycle symbol is on the left side of the sign or the path—for the use of bicycles.
- (3) The part of the footpath to the right of the centre of the footpath is designated—
 - (a) if a pedestrian symbol is on the right side of the sign or the path—for the use of pedestrians; or
 - (b) if a bicycle symbol is on the right side of the sign or the path—for the use of bicycles.
- (5) In this section—
 - pedestrian* does not include a person using a personal mobility device.

Notes—

- See section 243 about using a wheeled recreational device on a separated footpath.
- See section 244JA about using a personal mobility device on a separated footpath.

Division 3 Application of traffic control devices to persons

337 Purpose of division

This division explains when a traffic control device applies to a person.

338 References to traffic control devices—application to persons

In applying this regulation to a person, unless the contrary intention appears, a reference to a traffic control device is a reference to a traffic control device applying to the person.

339 When do traffic control devices apply to a person—the basic rules

- (1) A traffic control device applies to a person if—
 - (a) the device applies to the person under a provision of this division; or
 - (b) the device, the position of the device, or information on or with the device indicates that the device applies to the person.
- (2) A traffic control device does not apply to a person if information on or with the device expressly indicates that it does not apply to the person.
- (3) Subsection (2) applies despite any other provision of this division.
- (4) In subsection (1)(b)—

the device includes another traffic control device.

340 Traffic control devices (except road markings and parking control signs)

- (1) A traffic control device (except a road marking or parking control sign) applies to a person if—
 - (a) the device faces the person; or
 - (b) the person has passed the device and the device faced the person as the person approached it.
- (2) However, the device does not apply to the person if the position of the device indicates that it does not apply to the person.

Examples—

- 1 If a driver is driving in a marked lane of a multi-lane road, a traffic lane arrow above another marked lane does not apply to the driver.
- 2 If a driver is turning left using a slip lane at an intersection, a traffic light on the right side of the painted island or traffic island that separates the slip lane from other parts of the road does not apply to the driver.
- 3 If a driver is driving on a two-way road, a speed limit sign facing only traffic travelling in the opposite direction does not apply to the driver.

341 Road markings

A road marking on the surface of a road applies to a person on the road unless the position of the road marking indicates that it does not apply to the person.

Examples—

- 1 If a driver is driving on a road that is not a multi-lane road or one-way road, a road marking to the right of the centre of the road does not apply to the driver.
- 2 If a driver is driving in a marked lane of a multi-lane road, a road marking in another marked lane does not apply to the driver.
- 3 At an intersection, or on a roundabout, road markings indicating the edge of a marked lane for use by traffic coming from a

particular direction do not apply to a driver coming from another direction.

342 Traffic signs (except parking control signs) applying to a length of road

- (1) A traffic sign (except a parking control sign) applying to a length of road and to drivers applies to a driver driving on the length of road if the driver is driving in the same direction as a driver on the road who faces the sign before passing it.
- (2) A traffic sign applying to a length of road and to pedestrians applies to a pedestrian travelling on the length of road if the pedestrian is travelling in the same direction as a pedestrian on the road who faces the sign before passing it.
- (3) The traffic sign applies to the driver or pedestrian even though the driver or pedestrian does not pass the sign.

Example—

If a driver turns from a side road or private land onto a length of road to which a traffic sign applies, the traffic sign applies to the driver even though the driver does not pass the sign.

- (4) Subsections (1) to (3) do not affect the operation of the Criminal Code, section 24.

Editor's note—

Criminal Code, section 24 (Mistake of fact)

343 Traffic signs (except parking control signs) applying to an area

- (1) A traffic sign (except a parking control sign) applying to an area and to drivers applies to a driver driving on any road in the area.
- (2) A traffic sign applying to an area and to pedestrians applies to a pedestrian on any road in the area.
- (3) The traffic sign applies to the driver or pedestrian even though the driver or pedestrian does not pass the sign.

[s 344]

Example—

The shared zone signs on the roads into a shared zone apply to a driver who starts a journey inside the shared zone.

- (4) Subsections (1) to (3) do not affect the operation of the Criminal Code, section 24.

344 Traffic control devices applying to a driver in a marked lane

A traffic control device applying to a marked lane applies to a driver approaching, in or leaving the marked lane unless the position of the device indicates that it does not apply to the driver.

Example—

An overhead lane control device above a marked lane that the driver does not face as the driver approaches it does not apply to the driver.

345 Traffic control devices applying to a driver in a slip lane

A traffic control device applying to a slip lane applies to a driver approaching, in or leaving the slip lane.

346 Parking control signs

- (1) A parking control sign applying to a length of road applies to a driver on the length of road.
- (2) A parking control sign applying to an area applies to a driver in the area.
- (3) A parking control sign applies to a driver mentioned in subsection (1) or (2) even though the driver does not pass the sign.
- (4) Subsections (1) to (3) do not affect the operation of the Criminal Code, section 24.

Part 21 General

347 **Meaning of abbreviations and symbols**

Schedule 1 provides the meaning of certain abbreviations and symbols used in this regulation and on traffic control devices and traffic-related items.

348 **References to a driver doing something etc.**

If the context permits, a reference in this regulation to a driver doing or not doing something is a reference to the driver causing the driver's vehicle to do or not to do the thing.

Example—

The reference in section 27 to a driver turning left at an intersection is a reference to the driver causing the driver's vehicle to turn left at the intersection.

349 **References to certain kinds of roads**

A reference in this regulation to a road of a particular kind is a reference to a road of that kind at any relevant place.

Example—

Section 31 deals with a driver starting a right turn at an intersection from a road (except a multi-lane road). The section applies to a particular driver only if the road from which the driver is turning is not a multi-lane road at the intersection. In applying the section to the driver, it is irrelevant that the road is, or is not, a multi-lane road at another place away from the intersection.

350 **References to stopping or parking on a length of road etc.**

- (1) A driver stops or parks on a length of road or in an area if the driver stops or parks the driver's vehicle so any part of the vehicle is on the length of road or in the area.
- (2) A driver stops or parks within a particular distance from, before, or after, something if the driver stops or parks the

[s 351]

driver's vehicle so any part of the vehicle is within that distance.

Example for subsection (2)—

Section 190 provides that a driver must not stop on a road within 10m before or after a safety zone. The example diagram in section 190 shows a vehicle stopped so part of the vehicle is within 10m of the zone. For section 190, the vehicle is taken to be stopped within 10m of the zone.

- (3) A driver stops or parks on or across a driveway or other way of access for vehicles if the driver stops or parks the vehicle so that any part of the vehicle is on or across the driveway or way of access.
- (4) In this section—
park has the same meaning as in part 12.
stop has the same meaning as in part 12.

351 References to left and right

A driver drives to the left, or right, of a line, sign or anything else only if the driver's vehicle is completely to the left, or right, of the line, sign or other thing.

352 References to stopping as near as practicable to a place

A requirement in this regulation for a driver to stop as near as practicable to a place is not complied with only because the driver stops behind a vehicle that has stopped at the place.

Example—

If a driver stops behind a vehicle that has stopped at a stop sign or stop line in accordance with section 67, 68 or 121, the driver must, after the vehicle has proceeded, stop at the stop sign or stop line in accordance with the section.

352A Giving way to pedestrians crossing a road

- (1) This section applies to a driver at an intersection who is required, under a relevant provision, to give way to a

pedestrian who is crossing the road, or part of the road, the driver is entering.

(2) The driver is required to give way to the pedestrian only if the pedestrian's line of travel in crossing the road, or part of the road, the driver is entering is essentially at right angles to the edges of the road, or part of the road.

(3) In this section—

relevant provision means any of the following—

- (a) section 62(1)(a);
- (b) section 64(b);
- (c) section 67(4);
- (d) section 69(3);
- (e) section 72(3)(b) or (5)(c);
- (f) section 73(2)(b), (4) or (6)(b).

353 Prescribed offences for ch 5, pt 7 of the Act

For chapter 5, part 7 of the Act, offences against the following provisions are prescribed offences—

- (a) section 20;
- (b) section 56(1) and (2);
- (c) section 104(1), (2) and (3);
- (d) section 84A(1) of the Act;
- (e) the *Transport Operations (Road Use Management—Vehicle Registration) Regulation 2010*, sections 11, 127(2)(f) and (h)(ii);
- (f) the *Motor Accident Insurance Act 1994*, section 20(1) and (2).

[s 353AA]

353AA Prescribed offences for the Act, s 113A(2)(a) and (b)

For section 113A(2)(a) and (b) of the Act, offences against the following provisions are prescribed offences—

- (a) the *Transport Operations (Road Use Management—Vehicle Registration) Regulation 2010*, section 11;
- (b) the *Motor Accident Insurance Act 1994*, section 20(1) and (2).

353A People with disabilities symbols—Act, sch 4, definition *people with disabilities symbol*

For the Act, schedule 4, definition *people with disabilities symbol*, the following symbols are prescribed—

353B Power-assisted bicycles—Act, sch 4, definition *power-assisted bicycle*

- (1) This section prescribes, for the Act, schedule 4, definition *power-assisted bicycle*, vehicles that are, and vehicles that are not, power-assisted bicycles.
- (2) A vehicle mentioned in the Act, schedule 4, definition *power-assisted bicycle*, paragraph (a)(i) is a power-assisted bicycle if it—
 - (a) is a pedalec; or
 - (b) has 1 or more electric auxiliary motors with a maximum power output, or combined maximum power output, of not more than 200 watts.

-
- (3) A vehicle mentioned in the Act, schedule 4, definition *power-assisted bicycle*, paragraph (a)(i) is not a power-assisted bicycle if—
- (a) the vehicle has an internal-combustion engine; or
 - (b) either or both of the following apply to the vehicle—
 - (i) when propelled only by the motor or motors, the vehicle is capable of going faster than 6km/h;
 - (ii) the motor or motors of the vehicle are capable of operating when the vehicle is going faster than 25km/h.
- (4) In this section—
- pedalec* has the meaning given by the *Vehicle Standard (Australian Design Rule—Definitions and Vehicle Categories) 2005* (Cwlth).

Part 22 Repeal and transitional provisions

354 Repeal

The Transport Operations (Road Use Management—Road Rules) Regulation 1999, SL No. 246 is repealed.

355 Continuation of Transport Operations (Road Use Management—Road Rules) Regulation 1999, s 266

Despite the repeal of the *Transport Operations (Road Use Management—Road Rules) Regulation 1999*, section 266 of that regulation continues in force until the end of 10 March 2010.

[s 356]

356 References to Transport Operations (Road Use Management—Road Rules) Regulation 1999

A reference in an Act or other document to the *Transport Operations (Road Use Management—Road Rules) Regulation 1999* is, if the context permits, taken to be a reference to this regulation.
