Queensland Plant Protection Act 1989

PLANT PROTECTION
(BANANA BLACK SIGATOKA) QUARANTINE REGULATION 1997

Reprinted as in force on 10 August 1999
(includes amendments up to SL No. 96 of 1999)

Reprint No. 1B

This reprint is prepared by
the Office of the Queensland Parliamentary Counsel
Warning—This reprint is not an authorised copy
Information about this reprint

This regulation is reprinted as at 10 August 1999. The reprint shows the law as amended by all amendments that commenced on or before that day (Reprints Act 1992 s 5(c)).

The reprint includes a reference to the law by which each amendment was made—see list of legislation and list of annotations in endnotes.

This page is specific to this reprint. See previous reprints for information about earlier changes made under the Reprints Act 1992. A table of earlier reprints is included in the endnotes.

Also see endnotes for information about—
• when provisions commenced
• editorial changes made in earlier reprints.

PLANT PROTECTION (BANANA BLACK SIGATOKA) QUARANTINE REGULATION 1997

[as amended by all amendments that commenced on or before 10 August 1999]

PART 1—PRELIMINARY

Short title

1. This regulation may be cited as the Plant Protection (Banana Black Sigatoka) Quarantine Regulation 1997.

PART 2—TORRES STRAIT ISLANDS

Definitions for pt 2

2. In this part—

“banana plant” means a plant of the genus Musa, other than a banana black Sigatoka resistant cultivar mentioned in the schedule, but does not include the fruit of the plant.

“pest quarantine area” means the pest quarantine area declared under section 3.

Pest quarantine area

3. The area within the following boundary is declared to be a pest quarantine area—

- from latitude 10°28' south, longitude 142° east
- to latitude 10°28' south, longitude 143° east
Objects of quarantine

4. The objects of the quarantine for the pest quarantine area are—

(a) to prevent the banana black Sigatoka pest being spread in Queensland; and

(b) to eradicate the banana black Sigatoka pest in the pest quarantine area.

Restriction on moving, planting and cultivating banana plants

5. A person must not, without an inspector’s approval—

(a) move a banana plant out of the pest quarantine area; or

(b) move a banana plant from a parcel of land in the pest quarantine area to another parcel of land in the area; or

(c) plant a banana plant in the pest quarantine area; or

(d) cultivate a banana plant in the pest quarantine area.

---

1 Copies of a map showing the boundary of the pest quarantine area are available for inspection during office hours at—

(a) the department’s head office at 80 Ann Street, Brisbane; and

(b) the office of the Australian Quarantine and Inspection Service at the ground floor of the Pearl’s Building, Victoria Parade, Thursday Island.
Restriction on moving appliances and other things

6. A person must not, without an inspector’s approval, move an appliance or other thing that has been in contact with a banana plant—

(a) out of the pest quarantine area; or

(b) from a parcel of land in the pest quarantine area to another parcel of land in the area.

Treatment of banana plants

7.(1) This section applies to an owner of land in the pest quarantine area who grows a banana plant on the land.

(2) The owner must treat, or allow an inspector to treat, each banana plant growing on the land as follows—

(a) treat the leaf tissue that is dead or not green in colour by—

(i) burning it; or

(ii) burying it under at least 600 mm of soil;

(b) treat the pseudostem and leaf tissue, other than leaf tissue that is dead or not green in colour, by—

(i) cutting them into pieces of no more than 600 mm in length; and

(ii) leaving the pieces to rot on the surface of the soil or burying them under at least 1 m of soil;

(c) treat the corm, suckers and butt of each pseudostem by—

(i) removing them from the soil, cutting them into pieces of no more than 50 mm in diameter and either—

(A) leaving the pieces to rot on the surface of the soil; or

(B) burying them under at least 1 m of soil; or

(ii) injecting each pseudostem at a height of 30 cm above the ground with a 3.6% solution of glyphosate solution at a rate of 15 ml for each pseudostem and spraying any regrowth with a 0.2% solution of 2,4-D.
PART 3—WATTLE HILLS

Definitions for pt 3

8. In this part—

“banana plant” means a plant of the genus *Musa*, other than a banana black Sigatoka resistant cultivar mentioned in the schedule, and includes the fruit of the plant.

“pest quarantine area” means the pest quarantine area declared under section 9.

Pest quarantine area

9. The area within a 50 km radius of the point at latitude 12°34’ south and longitude 143°04’ east is declared to be a pest quarantine area.

Objects of quarantine

10. The objects of the quarantine are—

(a) to prevent the banana black Sigatoka pest being spread in Queensland; and

(b) to eradicate the banana black Sigatoka pest in the pest quarantine area.

Restriction on moving, planting and cultivating plants

11. A person must not, without an inspector’s approval—

(a) move a banana plant out of the pest quarantine area; or

(b) move a banana plant (other than the fruit of the plant) from a parcel of land in the pest quarantine area to another parcel of land within the area; or

(c) plant a banana plant in the pest quarantine area; or

(d) cultivate a banana plant in the pest quarantine area.
Owner of land to treat banana plants

12.(1) This section applies to an owner of land who grows a banana plant within 5 km of a place where the banana black Sigatoka pest has been found in the pest quarantine area.

(2) The owner must treat each banana plant growing within 5 km of the place as follows—

(a) treat the leaf tissue that is dead or not green in colour by—
   (i) burning it; or
   (ii) burying it under at least 600 mm of soil;

(b) treat the corm, suckers and butt of each pseudostem by—
   (i) removing them from the soil; and
   (ii) cutting them into pieces of not more than 50 mm diameter; and
   (iii) leaving the pieces to rot on the surface of the soil;

(c) treat the pseudostem and leaf tissue (other than leaf tissue that is dead or not green in colour) by—
   (i) cutting them into pieces not more than 600 mm long; and
   (ii) leaving the pieces to rot on the surface of the soil.
