Part 2 Syringes and dangerous drugs disposal procedures

3 Prescribed procedures for the disposal of hypodermic syringes and needles

For the purposes of section 10(4A) of the Act, the prescribed procedures for the disposal of a hypodermic syringe or needle are—

Example—

A and B are partners in a chain of pharmacies. They make cold tablets to sell in the pharmacies by compounding ephedrine (a controlled substance) with other substances.

The partners sell some of the left over ephedrine to a pharmaceutical research company and give the rest away.

Both the sale and gift of ephedrine are relevant transactions.

Editor's note—

Under section 43A of the Act—

supply means give, distribute, sell or supply.

section 10(2)

1 DPI researcher

A DPI researcher must—

- (a) keep class A research cannabis plants the researcher is growing securely locked in a glasshouse; and
- (b) grow class B research cannabis plants in an area that is fenced to delineate the area under production; and
- (c) if the chief executive requires the researcher to erect signs indicating the presence of class B research cannabis at a fenced area, ensure the signs are erected as required by the chief executive; and
- (d) keep industrial cannabis seed and class A and class B research cannabis seed in the researcher's possession or under the researcher's control locked in a secure place when not otherwise required—
 - (i) for use for planting; or
 - (ii) to be supplied to another person; and
- (e) keep a register that includes the following information—
 - (i) the varieties or strains of cannabis plants and cannabis seed under the researcher's control;
 - (ii) the source, quantity and delivery details for cannabis seed and plant varieties the researcher receives;
 - (iii) how, when and from whom the researcher received cannabis plants and seed delivered to the researcher;

- (iv) if a carrier delivered the cannabis plants or seed to the researcher, the name of the person who delivered the plants or seed;
- (v) if a researcher engages a carrier to deliver cannabis plants or seed to someone else—
 - (A) the name of the person to whom the plants or seed were given for delivery; and
 - (B) the name of the person to whom it is intended the plants or seed be supplied by the researcher.

2 Inspector

An inspector who possesses industrial cannabis plants or seed or class A or class B research cannabis plants or seed for supplying them to someone else under part 4 must keep the plants or seed in a secure place until the inspector supplies them to the person.

3 Analyst

- (1) This section applies if an analyst is engaged or employed to analyse a substance to determine its THC concentration.
- (2) The analyst must analyse the substance in a NATA accredited laboratory.
- (3) The analyst must keep standard THC material in a securely locked place other than when the analyst is using the material in analysing the substance to determine its THC concentration.
- (4) The analyst must keep the substance in a securely locked place other than when the analyst is analysing the substance.
- (5) In this section—

substance means a substance the analyst reasonably believes to be any of the following—

- (a) industrial cannabis plants;
- (b) class A or class B research cannabis plants;

(c) processed cannabis.

Schedule 8 Licence conditions

section 29(1)

Part 1 General conditions

- 1 A licensee must keep cannabis seed in the licensee's possession in a securely locked place, other than when the licensee uses the seed for a purpose that is authorised under the licensee's licence.
- 2 As soon as reasonably practicable after a licensee receives a package containing cannabis plants or seed that appears to have been tampered with, the licensee must inform an inspector or a police officer that the package appears to have been tampered with.
- 3 A licensee who proposes to supply industrial cannabis seed for sale by wholesale or retail must ensure—
 - (a) if the seed is cannabis seed harvested from an industrial cannabis plant—the seed is labelled so as to describe the seed as cannabis seed harvested from an industrial cannabis plant; or
 - (b) if the seed is to be supplied as planting seed—the seed is labelled with the required particulars.

Note—

See section 27C for additional labelling requirements.

Part 2 Particular conditions for researcher licences

- 4 A researcher, whose licence is subject to a condition prohibiting the researcher from dealing with class A research cannabis plants and seed, must allow an inspector to destroy, or supervise the destruction of, cannabis plants in the

possession of the researcher that have been found, by an analyst conducting a laboratory analysis of a random sample of the leaves and flowering heads of the plants, to have a concentration of THC in their leaves and flowering heads of 3% or more.

- 5 A researcher, whose licence is subject to a condition prohibiting the researcher from dealing with class A research cannabis plants and seed, must ensure, as far as practicable, that cannabis seed supplied to the researcher by a person in another State or a foreign country is certified as seed that, if grown, will produce cannabis plants with a THC concentration in their leaves and flowering heads of less than 3%.
- 6 A researcher must carry out activities under the researcher's licence in accordance with the approved research plan for the licence.

Part 3 Particular conditions for grower licences

- 7 A grower must allow an inspector to destroy, or supervise the destruction of, cannabis plants in the possession of the grower that have been found, by an analyst conducting a laboratory analysis of a random sample of the leaves and flowering heads of the plants, to have a THC concentration in their leaves and flowering heads of more than 1%.

Part 4 Particular conditions for seed handler licences

- 8 A seed handler must—
 - (a) ensure all industrial cannabis seed in the possession of the seed handler is labelled to state—

- (i) if the seed is cannabis seed harvested from an industrial cannabis plant—that fact; or
- (ii) if the seed is intended to be used or supplied as planting seed—the required particulars; and

Note—

See section 27C for additional labelling requirements.

- (b) pack all industrial cannabis seed to be delivered to someone else by a carrier in a way that ensures, as far as reasonably practicable, seed can not escape from the packaging or be accidentally released or tampered with.
