Information about this reprint

This regulation is reprinted as at 25 July 2003. The reprint shows the law as amended by all amendments that commenced on or before that day (Reprints Act 1992 s 5(c)).

The reprint includes a reference to the law by which each amendment was made—see list of legislation and list of annotations in endnotes. Also see list of legislation for any uncommenced amendments.

This page is specific to this reprint. See previous reprints for information about earlier changes made under the Reprints Act 1992. A table of reprints is included in the endnotes.

Also see endnotes for information about—

- **when provisions commenced**
- **editorial changes made in earlier reprints.**

Dates shown on reprints

Reprints dated at last amendment All reprints produced on or after 1 July 2002, hard copy and electronic, are dated as at the last date of amendment. Previously reprints were dated as at the date of publication. If a hard copy reprint is dated earlier than an electronic version published before 1 July 2002, it means the legislation was not further amended and the reprint date is the commencement of the last amendment.

If the date of a hard copy reprint is the same as the date shown for an electronic version previously published, it merely means that the electronic version was published before the hard copy version. Also, any revised edition of the previously published electronic version will have the same date as that version.

Replacement reprint date If the date of a hard copy reprint is the same as the date shown on another hard copy reprint it means that one is the replacement of the other.

(1) In the case of the death of the holder of a mining claim, exploration permit, mineral development licence or mining lease the Minister may, if satisfied—

- (a) that a will has been left by that holder, and that probate of such will or administration with such will annexed has not been granted within 6 months after death, or that a will has not been left, and that administration of the estate has not been granted within that time; and
- (b) that the value of the estate is not sufficient to justify the expense of taking out probate or administration;

cause transmission by death to be entered in the appropriate register relating to the mining claim, exploration permit, mineral development licence or mining lease as if probate or letters of administration with the will annexed or, if the deceased died without leaving a will, letters of administration had been duly granted.

(2) After transmission by death has been entered, the person or persons to whom the estate or interest of the deceased holder of the mining claim, exploration permit, mineral development licence or mining lease has been transmitted are to have all rights, powers and liabilities concerning the interest as if probate, or administration with the will annexed, or administration of the estate of the deceased person had been granted to that person or those persons.

copy of the sequestration order, certificate of appointment or other document evidencing the claim of the applicant and the prescribed fee.

(2) If the request is pursuant to any composition, scheme of arrangement or assignment or to any deed of arrangement the document evidencing such composition, scheme or arrangement is to be produced for inspection.

72 Request to record death of joint holder

A request to record death of a holder in respect of any joint interest in a mining claim, exploration permit, mineral development licence or mining lease is to be made in the approved form and is to be accompanied by—

- (a) a certified copy of entry of record of death; and
- (b) the certificate of grant of mining claim, exploration permit, mineral development licence or mining lease the subject of the request; and
- (c) the prescribed fee.

73 Request for change or correction of name

(1) A holder of a prospecting permit, mining claim, or mining lease may apply to the mining registrar to record a change or correction of name of that holder and a holder of an exploration permit or mineral development licence is to apply to the chief executive.

(2) A request is to be made in the approved form and be accompanied by proof of change of name which is to include—

- (a) a certified copy of entry of record evidencing change of name or correct name; and
- (b) the prospecting permit, certificate of grant of mining claim, instrument of mineral development licence or mining lease the subject of the request; and

74 Survey plan to be lodged with the chief executive

(1) This section applies if the Minister—

- (a) under section 300(5) of the Act, requires the holder of a mining lease to have a survey of the lease carried out; or

- (b) under section 407 of the Act, asks the applicant for the grant of or holder of a mining claim, exploration permit, mineral development licence or mining lease to have land surveyed or further surveyed.

(2) The survey plan—

- (a) must be lodged with the chief executive for registration in the department; and
- (b) unless lodged by an officer of the department, must be accompanied by the prescribed fee when it is lodged.

(3) If the survey has not conformed with the requirements of the Act, the chief executive may do 1 or more of the following—

- (a) make requisitions about the survey;
- (b) require satisfaction of requisitions within a stated time;
- (c) reject the survey plan.

Examples of a survey not conforming with the requirements of the Act—

1. Land is not surveyed in the way approved by the Minister under section 300(5) or 407(2) of the Act.

SCHEDULE 1**RATE OF ROYALTIES**

section 45

**PART 1—ROYALTIES FOR COPPER, GOLD, LEAD,
SILVER AND ZINC***Division 1—Application and choices about royalties***1 Application of part**

This part only applies to the following minerals—

- (a) copper;
- (b) gold;
- (c) lead;
- (d) silver;
- (e) zinc.

2 Royalty rates and choices

(1) The royalty rate for copper, gold, lead, silver and zinc is 2.7%.

(2) However, a person paying royalty may, when first giving the chief executive a royalty return for mineral sold, disposed of or used after 31 December 2000 (other than as a bulk sample approved by the Minister), decide to pay royalty for a mineral at the rate worked out under division 2.

(3) If the person decides to pay the royalty for a mineral under division 2, the person must pay royalty for the mineral under division 2 for all mineral sold, disposed of or used before 1 January 2006.

SCHEDULE 1 (continued)

*Division 2—Variable royalty rates***3 Royalty rates and royalty base rates**

(1) This division sets royalty rates for copper, gold, lead, silver and zinc using reference prices and royalty base rates.

(2) Reference prices and royalty base rates are used to work out royalty rates for minerals.

4 Reference prices

(1) This section sets prices (“**reference prices**”) for copper, gold, lead, silver and zinc.

(2) Reference prices are in Australian dollars.

(3) Reference prices for copper, lead and zinc are for a tonne of mineral.

(4) Reference prices for silver and gold are for a troy ounce of mineral.

(5) The first reference price (“**reference price 1**”) is as follows—

(a) for copper—\$2 640;

(b) for gold—\$430;

(c) for lead—\$740;

(d) for silver—\$5;

(e) for zinc—\$1 455.

(6) The second reference price (“**reference price 2**”) is as follows—

(a) for copper—\$3 300;

(b) for gold—\$540;

(c) for lead—\$925;

(d) for silver—\$7;

(e) for zinc—\$1 815.

(7) The third reference price (“**reference price 3**”) is as follows—

(a) for copper—\$4 180;

(b) for gold—\$680;

SCHEDULE 1 (continued)

- (c) for lead—\$1 170;
- (d) for silver—\$9;
- (e) for zinc—\$2 300.

5 Royalty base rates

(1) This section sets royalty rates (“**royalty base rate**”) for copper, gold, lead, silver and zinc (the “**mineral**”) at reference prices.

(2) The royalty base rate for the mineral is—

- (a) at reference price 1—1.5% of the value of the mineral; or
- (b) at reference price 2—2.5% of the value of the mineral; or
- (c) at reference price 3—4.5% of the value of the mineral.

6 Working out royalty rates

(1) To work out the actual royalty rate for a mineral, work out the average market price and compare it with the mineral’s reference price.

(2) If the average market price is lower than reference price 1, the royalty rate is the royalty base rate for reference price 1.

(3) If the average market price is higher than reference price 3, the royalty rate is the royalty base rate for reference price 3.

(4) If the average market price is equal to or higher than reference price 1 but lower than reference price 2, the royalty rate payable is the total of the royalty base rate at reference price 1 and 1% of the relevant percentage, rounded down to 2 decimal places.

(5) If the average market price is equal to or higher than reference price 2 but not higher than reference price 3, the royalty rate payable is the total of the royalty base rate at reference price 2 and 2% of the relevant percentage, rounded down to 2 decimal places.

(6) In this section—

“**relevant percentage**” means—

- (a) for subsection (4)—the difference between reference price 1 and the average market price expressed as a percentage of the difference between reference prices 1 and 2; or

SCHEDULE 1 (continued)

- (b) for subsection (5)—the difference between reference price 2 and the average market price expressed as a percentage of the difference between reference prices 2 and 3.

Examples—

1. For subsection (2), if the average market price is \$2 200, the royalty payable for copper is 1.5%.
2. For subsection (3), if the average market price is \$4 200, the royalty payable for copper is 4.5%.
3. For subsection (4), if the average market price is \$3 000, the royalty payable for copper is 2.04% (1.5% plus .54%).
4. For subsection (5), if the average market price is \$3 700, the royalty payable for copper is 3.4% (2.5% plus 0.45% x 2).

Division 3—Other provisions about royalties**7 Basis for working out values**

For working out royalties payable for copper, gold, lead, silver and zinc, the value of the mineral is the value of payable metal before deducting land transport, smelting and refining charges, but after deducting sea transport costs to ports outside Queensland or any other costs that, in the Minister's opinion, are reasonable.

8 General concessions

(1) For each mining project, no royalty is payable on the first \$30 000 of the value of mineral sold, disposed or used from the project for a royalty period.

(2) For each mining project's production of copper, lead and zinc, only half royalty is payable on the next \$4 million of the total value of the copper, lead and zinc for a royalty period.

(3) If a mining project is not operational for a part of a royalty period, the amount mentioned in subsection (2) must be reduced by the percentage of the royalty period when the mining project was not operational.

SCHEDULE 1 (continued)

9 Royalty discounts

(1) This section applies to royalties payable for copper, lead and zinc sold, disposed of or used after 31 December 1997 and smelted or refined in Queensland (“**processed mineral**”).

(2) If there is at least 95% metal in processed mineral, the royalty payable for the processed mineral must be reduced by the following percentage—

- (a) for copper—20%;
- (b) for lead—25%;
- (c) for zinc—35%.

PART 2—ROYALTIES FOR OTHER MINERALS**10 Royalties on certain minerals**

The royalty payable on each tonne of a mineral specified in the following table is shown opposite the mineral—

11 Silica and mineral sands

The royalty payable on silica (as distinct from sand and silicates) is the higher of the following—

- (a) 5% of the silica's value;
- (b) 50 cents per tonne of silica.

SCHEDULE 1 (continued)

12 Mineral sands

The royalty payable on rutile, monazite, zircon and ilmenite concentrates is 5% of the value of the concentrate.

13 Coal

The royalty payable on coal mined is 7% of the coal's value worked out by the Minister under section 51.

14 Bauxite

(1) The royalty payable on bauxite mined for consumption outside the State is the higher of the following—

- (a) 10% of the net f.o.b. return per tonne taking into account income of any type arising directly from the sale, disposal or use of the bauxite, but not a deduction for royalty;
- (b) \$1 per tonne.

(2) The royalty payable on bauxite mined for consumption within the State is half the royalty worked out under subsection (1).

15 Corundum, gemstones and precious stones

(1) This section applies only if the value of corundum, gemstones or precious stones sold, disposed of or used in a royalty period is more than \$30 000.

(2) The royalty payable on corundum, gemstones and precious stones, including agate, sapphire and opal, is 2.7% of the value of the corundum, gemstones or precious stones after deducting \$30 000 from the value.

16 Phosphate

(1) The rate of royalty payable on phosphate rock is the higher of—

- (a) 80 cents for each tonne of phosphate rock; or

SCHEDULE 1 (continued)

(b) the rate worked out using the formula—

$$R = \$1 \times \frac{G}{32.3} \times \frac{P_{\text{curr}}}{\$72.50}$$

(2) In this section—

“**G**” means the average P_2O_5 content of the phosphate rock for the quarter.

“**P_{curr}**” means the average price for the quarter, converted to Australian dollars at the relevant exchange rate, of Moroccan phosphate rock with 32.3% P_2O_5 content.⁴

“**quarter**” means a period of 3 months for which a royalty return for the phosphate rock must be given to the chief executive.

“**R**” means the royalty rate for each tonne rounded down to 2 decimal places.

“**relevant exchange rate**”, for a quarter, means the average, calculated over the quarter, of the hedge settlement rate for each day of the quarter.

Example of how to work out rate of royalty payable—

If, for a particular quarter, the average price of Moroccan phosphate rock with 32.3% P_2O_5 content is US\$46, the relevant exchange rate is 0.65 cents and the average P_2O_5 content of phosphate rock is 24%, then—

$$\begin{aligned} R &= \$1 \times \frac{24.0}{32.3} \times \frac{\$70.77}{\$72.50} \\ &= 72.53 \text{ cents} \end{aligned}$$

Because 72.53 cents is less than 80 cents, the rate of royalty payable is 80 cents for each tonne.

17 Gaseous hydrocarbons

(1) The royalty on gaseous hydrocarbons is payable at the rate applying to petroleum under the *Petroleum Act 1923*, section 55(1).⁵

⁴ The price, in US dollars, of Moroccan phosphate rock with 32.3% P_2O_5 content is published in the magazine called Fertilizer Week.

⁵ *Petroleum Act 1923*, section 55 (Royalty)

SCHEDULE 1 (continued)

(2) However, royalty is not payable on gaseous hydrocarbons that the person paying the royalty flares, vents or uses for prospecting for, or recovering, gaseous hydrocarbons.

(3) For subsection (1), the way for working out the value of gaseous hydrocarbons is the way stated in the *Petroleum Act 1923*, section 57.⁶

18 Other minerals

(1) This section applies to a mineral not already mentioned in this schedule.

(2) The royalty rate payable on the mineral is 2% of the gross proceeds of the sale, disposal or use of the mineral for each year, after deducting \$30 000 from the gross proceeds.

18A Oil shale

(1) The royalty payable on oil processed from oil shale is the lesser of—

- (a) 10% of the oil's value; or
- (b) the WTI%, rounded to a second decimal place, of the oil's value.

(2) The WTI% is worked out using the formula—

$$\text{WTI}\% = \left(\left[\frac{\text{CPI}_{\text{BASE}}}{\text{CPI}_{\text{NOW}}} \times \text{WTI} \right]^2 \div 1\,000 \right) + 0.5$$

(3) In subsection (2)—

“CPI” means the ‘Consumer Price Index: All Groups Index Numbers—Weighted average of 8 capital cities’ published by the Australian Bureau of Statistics.

“CPI_{BASE}” means the CPI for the December quarter 1993.

“CPI_{NOW}” means the CPI for the calendar quarter to which the calculation relates.

“WTI” means the ‘Crude Oil West Texas—Spot—Last’ price in US dollars per barrel published in the Australian Financial Review,

⁶ *Petroleum Act 1923*, section 57 (Ascertainment of value)

SCHEDULE 1 (continued)

converted to Australian dollars at the hedge settlement rate, for each day of trading, averaged over the calendar quarter to which the calculation relates.

Example of how to work out royalty payable—

The CPI_{BASE} is 110.0. If, for a particular quarter, the CPI is 134.2 and the WTI is \$A30, then the $WTI\% = \left(\frac{[110.0 \times 30]^2}{134.2} \div 1\,000 \right) + 0.5$
 $= 1.10\%$

Because 1.10% is less than 10%, the royalty payable is 1.10% of the oil's value.

(4) No royalty is payable on the first 1 600 000 barrels of oil processed, in a calendar year, from oil shale from mining lease 80003.

(5) If less than 1 600 000 barrels are processed in any calendar year, the shortfall can be carried forward (and added to the 1 600 000 exemption) for the next calendar year.

(6) However, any unused shortfall can not be carried forward beyond that next calendar year.

Example—

In 1998, 1 300 000 barrels are produced.

In 1999, 1 700 000 barrels are produced.

In 2000, 2 000 000 barrels are produced.

In 1998, no royalty is payable because production is 300 000 below 1 600 000. The shortfall of 300 000 is carried forward to 1999.

In 1999, no royalty is payable because production is 200 000 below 1 900 000 (ie. 1 600 000 + 300 000). There is no shortfall from 1999 to carry forward because 1 700 000 is above 1 600 000. Also, the unused shortfall from 1998, ie 200 000, is not carried forward to 2000.

In 2000, royalty is payable on the 400 000 barrels produced above 1 600 000, with no shortfall to be carried forward.

(7) In this section—

“shortfall” means the shortfall between the number of barrels actually processed and 1 600 000 barrels.

“unused shortfall” means any shortfall that was carried forward but not used in the year in which it was carried forward.

(8) Subsections (4) to (8) expire on 1 January 2006.
